EDUCATION

CALIFORNIA STATE UNIVERSITY, EAST BAY

M.S. Business Analytics, GPA - 3.7/4

Hayward, CA

Aug 2024 - May 2026

Relevant Coursework: Data Mining, Data Analytics, Data Engineering, Project Management, Time Series Analytics

UNIVERSITY OF MUMBAI

B.S. Computer Engineering, GPA - 8.3/10

India

Aug 2018 - May 2022

Relevant Coursework: Python Programming, Machine Learning, Data Warehousing, Management Information Systems

WORK EXPERIENCE

JIO PLATFORMS LIMITED

India

Software Engineer (Assistant Manager)

Sep 2022 – Jun 2024

- Developed RESTful APIs to migrate the Enterprise Product Catalog from Ericsson Conceptwave's monolithic architecture to a scalable microservices-based system using open-source technologies. This transition improved modularity and reduced vendor dependency, cutting integration costs by 20%.
- Automated and optimized deployment configurations by implementing dynamic IP and port management, resulting in a 20% reduction in deployment time and fewer post-deployment issues.
- Wrote complex SQL queries to support the migration of structured data from a relational database to MongoDB as part of a scalable ETL pipeline built with Apache NiFi. This enabled smoother data transformation and improved query performance for downstream applications by 15%.
- Managed project tracking on Microsoft Azure Boards by assigning tasks, monitoring bugs during testing, and coordinating release readiness, which improved deployment efficiency and feature delivery timelines by 10%.

LONZA

Vacaville, CA

Intern, Business Analysis (Quality Control)

May 2025 – Aug 2025

- Built a SharePoint site to help the QC team manage tasks and schedules in one place, and automated approval and review workflows to speed up the testing process.
- Collaborated with business analysts to extract and integrate data from SAP and LIMS into a Power BI data model to forecast raw material quantities for both Roche and Lonza, improving planning efficiency by 15%.

PROJECTS

[All Projects on my Portfolio](#)

Stock Spectrum | Python, Machine Learning, Tableau, Streamlit, Google Gemini

[Link to Project](#)

- An AI-assisted financial analysis tool leveraging historical stock data, Yahoo Finance API, and Google Gemini LLM to provide predictive insights and interactive Tableau visualizations for non-experts.
- Built and deployed a Streamlit web application integrating machine learning models for stock price prediction, achieving intuitive user interaction and data analysis workflows.

Product Recommendation System | Association Rules, Clustering

[Link to Project](#)

- Developed a recommendation engine for a small business, analyzing purchase patterns to suggest frequently bought-together electronic appliances, boosting sales and customer engagement.
- Implemented Product Clustering to group similar products, enabling personalized recommendations and improving user experience within the interactive web application.

CERTIFICATES & ACHIEVEMENTS

- Microsoft Business Analyst Professional Certificate
- Data Analytics Hackathon (Datathon 1.0) - 3rd Place

SKILLS

Programming Languages: Python, R, JavaScript | **Visualization & Reporting:** Excel, Power BI, Tableau | **Frameworks:** Apache Airflow, Node.js | **Cloud:** AWS, Google Cloud | **Databases:** SQL, MongoDB | **Version Control:** Git | **Project Management:** Azure DevOps,
